

SURIYA PRASATH PARAMESWARAN

DATA ANALYST

Leeds, UK · +44 7887 299164 · suriyavictor6@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFILE

Data analyst with strong foundations in SQL, Python, and Power BI, holding an MSc in Data Science and Analytics from the University of Leeds. Project and dissertation experience spans banking analytics, financial performance reporting, and cybersecurity risk modelling across large datasets. Comfortable writing SQL against multi-table databases, building Power BI dashboards, and turning findings into clear recommendations for non-technical stakeholders.

EXPERIENCE

Data Science Researcher · University of Leeds (MSc Dissertation)

Sep 2024 — Sep 2025

- Built a model classifying 29,000 cybersecurity vulnerabilities by severity, helping security teams prioritise which issues to fix first
- Compared two analytical approaches; the stronger one hit F1 of 0.81 on the critical severity class, with built-in explainability showing why each item was flagged
- Shipped the final model as a Streamlit web app for end-user review, with experiment tracking and automated testing in place

Tools - Python · SQL · XGBoost · Streamlit · MLflow · Git

Freelance Data Analyst · Self-Employed

2024 — Present

- Built a Power BI inventory and sales dashboard for a family-owned grocery shop with 200+ products; owner logs daily stock and sales, dashboard returns live profit, best-sellers, and a year-end performance summary
- Worked directly with a non-technical owner to translate reporting needs into a simple data-entry workflow with decision-ready output

IoT & Data Analytics Intern · Shree Kay Vee Automation

Jan 2023 — Apr 2023

- Analysed IoT sensor data from manufacturing equipment to identify patterns linked to machine performance and failure risk; built dashboards used by the operations team
- Improved data quality and reporting reliability through structured preprocessing and validation workflows

PROJECTS

Campaign ROI Optimisation — Bank Telemarketing

2025

- Ranked 41,000 Portuguese bank customers by expected profit using SQL, prioritising which prospects to call within a fixed daily capacity
- Top 1,000 ranked customers hit 77% conversion vs 11.3% baseline, a 6.8x lift worth £108K projected profit at 2,500 daily calls; macroeconomic factors (employment, interest rates, seasonality) drove conversion more than customer attributes
- Shipped a 3-page Power BI dashboard where operators set any call capacity and instantly see expected profit, ROI, and the recommended target list

Tools - SQL · DuckDB · Power BI · DAX · Power Query · Python

Financial Performance Intelligence Dashboard

2025

- Built a 3-page Power BI dashboard tracking 14 years of financials (2009-2023) across 15 major companies and 6 sectors including IT, Finance, Banking, FMCG, Logistics, and Manufacturing
- Designed a star schema with a custom date table for time intelligence; added drill-through navigation so users jump from sector KPIs to individual company financials in one click
- Quantified COVID-19 revenue impact by sector, ranked sectors by ROE and ROA, and flagged companies with disproportionate debt-to-equity ratios

Tools - Power BI · DAX · Power Query · Excel

EDUCATION

MSc Data Science and Analytics · University of Leeds

Sep 2024 — Sep 2025

Graduate research in machine learning, NLP, and risk modelling; strong academic performance in Machine Learning, Statistical Learning, and Natural Language Processing.

BE Mechanical Engineering · Easwari Engineering College

Jun 2018 — Mar 2022

SKILLS

DATABASES & SQL	PostgreSQL, MySQL, SQL (joins, CTEs, window functions, aggregations), data cleaning, EDA
BI & VISUALISATION	Power BI, DAX, Power Query, Tableau, Looker Studio, Excel (PivotTables, VLOOKUP)
PROGRAMMING & TOOLS	Python (pandas, NumPy, matplotlib), R, Git, Jupyter, Streamlit, Plotly, pgAdmin
ANALYTICS & STATS	Customer segmentation (RFM), cohort analysis, A/B testing, KPI reporting, hypothesis testing
